**Subject:** RE: Application Missing page 2 re: Town of Vestal Development with over 2500 gpd - The Retreat at Bunn Hill

Billie Goodson:

Please bear with the Town as I have never been through this process and appreciate your patience. Please excuse the missing page 2 (Appendix A), I could not find this form in its entirety on any website associated with the BJSTP and only had page 1 in Town records previous to my tenure.

Per Mr. Crumb's comments I have corrected the application to include page 2. On page 1, the applicant's email has been added to the application. I have also filled out the I/I Remediation Basin with "Bunn Hill Trunk Sewer Shed" taken from Mr. Crumb's comments as the link on the application is no longer working.

If I am following the flow chart correctly, I have signed the Principal User and would send this to the intermediate (there isn't one in this case), the Affected owner and the Sewage Board. Who is the affected owner?

Per Mr. Crumb's comments:

There is no Consent Order on the Town of Vestal regarding an overflow, but I would like to meet or teleconference to discuss the overflow and find an acceptable solution for all parties. The Town has installed a hinged manhole cover on the subject manhole that will relieve the sewer line when the Sewer Plant closes and blocks the Town's sewer flows.

Vern
